1. Purpose

The purpose of the Key Control Policy is to protect the property and privacy of MTX Group, and of individuals assigned to use the apartment and office facilities, by limiting access to such facilities to assigned individuals. Recognition has been given to the fact that the Operations team and Landlords have a responsibility for the maintenance of all spaces, including all building systems, and as such, may have a need for access to certain spaces occupied by others. The Operations team also has the responsibility to effectively manage and control the distribution of keys to Employees. In this policy the term “Key” means, physical keys, key cards, access codes and any other form of physical security or encryption access.

4. Duplication

All keys referred to in this policy are the property of MTX Group and are not to be duplicated by anyone other than the IT Operations or Office Management team. Duplication of a key, or the possession of an unauthorized duplicate, may result in appropriate disciplinary action.

5. Key Retrieval

Upon termination of employment, all keys must be immediately returned to the relevant representative from the IT Operations or Office Management Team. Failure to return keys upon termination/separation may result in holding the Employee and/or contractor responsible for the cost to re-key a room, office or building, or apartment if they do not return their key(s) prior to leaving the MTX. Failure to return issued key(s) will result in a minimum of a \$100 fee per key, additionally, if payment of this fee is not made to

MTX Group, it will be deducted from the Employee's final paycheck, which may be held for up to two weeks.

6. Forms and Procedures

All key requests are issued by US Operations. You can submit your request via an Intake Request and selecting IT Operations.

7. Enforcement

The policy and its enforcement and implementation, are the responsibility of the Operations team. All MTX Staff shall ensure that keys are not issued to individuals which would provide access to areas other than those to which the person issued the key would ROUTINELY need access. The Operations team shall have the responsibility to ensure that key requests and all appropriate authorizations have been obtained prior to issuing keys.
